**seth speaks pdf:** *Reincarnation in America* Lee Irwin, 2017-07-31 Reincarnation in America: An Esoteric History surveys the complex history of reincarnation theories across multiple fields of discourse in a pre-American context, ranging from early Greek traditions to Medieval Christian theories, Renaissance esotericism, and European Kabbalah, all of which had adherents that brought those theories to America. Rebirth theories are shown in all these groups to be highly complex and often disjunctive with mainstream religions even though members of conventional religions frequently affirm the possibility of rebirth. As a history of an idea, reincarnation theory is a current, vital belief pattern that cuts across a wide spectrum of social, cultural, and scientific domains in a long, complex history not reducible to any specific religious or theoretical explanation. This book is cross-disciplinary and multicultural, linking religious studies perspectives with science based research; it draws upon many distinct disciplines and avoids reduction of reincarnation to any specific theory. The underlying thesis is to demonstrate the complexity of reincarnation theories; what is unique is the historical overview and the gradual shift away from religious theories of rebirth to new theories that are therapeutic and trans-traditional.

**seth speaks pdf: Lemuria** Justin McHenry, 2024-01-09 Is Lemuria a real place or the fever dream of crackpots, mystics, conspiracy theorists, and Bigfoot hunters? Below the waters where the Pacific and Indian Oceans lies a lost continent. One of hopes and dreams that housed a race of beings that arrived from foreign planets and from which sprang humanity, religion, civilization, and our modern world. It was called Lemuria and it was all fake. What began as a theoretical land bridge to explain the mystery of lemurs on Madagascar quickly got hijacked to become the evolutionary home of humankind, the cradle of spirituality, and then the source of cosmological wonders. Abandoned by science as hokum, Lemuria morphed into a land filled with ancient, advanced civilizations, hollowed-out mountains full of gold and crystals, moon-beings descending in baskets, underground evil creatures, and a breast-feeding Bigfoot. The history of Lemuria is populated with a dizzying array of people from early Darwinists to conspiracy spouting Congressmen, globetrotting madams, Rosicrucians, Hollow-Earthers, sci-fi writers, UFO contactees, sleeping prophets, New Age channelers, a "Mother God", and a tequila swigging conspiracy theorist. Historian Justin McHenry provides a thoughtful exploration of how pseudo-science hijacked the gentle Victorian-era concept of Lemuria and, in following decades, twisted it into an all-encompassing home for alternative ideas about race, spirituality, science, politics, and the paranormal.

**seth speaks pdf:** *The United Kingdom's Strategy for Countering International Terrorism* Home Office, 2009 This document sets out the United Kingdom's strategy, known as CONTEST, for countering the threat from international terrorism. The aim of CONTEST is to reduce the risk to the United Kingdom (UK) and its interests overseas from international terrorism, so that people can go about their lives freely and with confidence. This is a revised and more detailed version of the strategy contained in The national security strategy of the United Kingdom (Cm. 7291, 2008, ISBN 9780101729123). The first part sets the context with a brief history of the changing threat to the United Kingdom and to UK interests overseas from international terrorism, examines the present threat, the factors which are shaping it and the assumptions about how it may develop. The second part sets out the principles which will govern the strategy, including a commitment to human rights and the rule of law, recognition of the need to address the causes as well as the symptoms of terrorism and the need to co-operate with other countries. The four main streams of the CONTEST strategy are: (1) pursue - to stop terrorist attacks; (2) prevent - to stop people becoming terrorists or supporting violent extremism; (3) protect - to strengthen our protection against terrorist attack; (4) prepare - where an attack cannot be stopped, to mitigate its impact. The third part of the document outlines who will deliver the strategy and how its impact will be measured. The document concludes with a section explaining the importance of communications as a part of the counter-terrorism strategy.

**seth speaks pdf:** Joan Brown Janet Bishop, Nancy Lim, 2022-11-19 This exhibition catalog accompanies a retrospective exhibition of prolific San Francisco-born painter Joan Brown (1938-1990), the first significant survey of her work in more than twenty years. Joan Brown charts the turns and devotions of a vision that was once dismissed by critics as unserious but was in fact rooted firmly in research and impassioned curiosity that remains uniquely compelling today. Deeply embedded in the Bay Area art scene, Brown drew inspiration from many sources to create a charmingly offbeat body of work that merges autobiography, fantasy, and whimsy with weightier metaphysical and spiritual imagery and themes. Featuring texts by curators Janet Bishop and Nancy Lim as well as essays by Solomon Adler, Marci Kwon, and Helen Molesworth, this lavishly illustrated book establishes Brown's relationship to the self and family, to art history, and to her wider artistic community, while examining the unique materiality of her paintings and exploring her singular vision. In addition, select Brown works will be paired with commentaries by contemporary artists ranging from friends and peers, such as Ron Nagle, to younger artists inspired by her work, such as Woody De Othello--

**seth speaks pdf:** RussiaGate and Propaganda Oliver Boyd-Barrett, 2019-07-04 This book furthers our understanding of the practice of propaganda with a specific focus on the RussiaGate case. RussiaGate is a discourse about alleged Russian meddling in US elections, and this book argues that it functions as disinformation or distraction. The book provides a framework for better understanding of ongoing developments of RussiaGate, linking these to macroconsiderations that rarely enter mainstream accounts. It demonstrates the considerable weaknesses of many of the charges that have been made against Russia by US investigators, and argues that this discourse fails to take account of broader non-transparent persuasion campaigns operating in the election-information environment that are strengthened by social media manipulation. RussiaGate has obscured many of the factors that challenge the integrity of democratic process in the USA. These deserve a much higher priority than any influence that Russia may want to exert. The book concludes that RussiaGate discourse needs to be contextualized with reference to a long-established broader competition between great powers for domination of EurAsia. This pitches the US/European Union against Russia/China and perhaps, ultimately, even the USA against Europe. This book will be of much interest to students of media and communication studies, propaganda studies, US politics, Russian politics, and International Relations in general.

Joshua Kurlantzick traces the ways in which China is trying to build an information and influence superpower and critically examines the new conventional wisdom that Beijing has been extremely successful in these efforts. In some ways, he argues, China has built the foundations of a global media and information superpower, including global TV networks, social media platforms, global radio networks, apps, and the backbones of wireless and wired networking, but has yet to reap many gains from its efforts, and actually has alienated many other states.

**seth speaks pdf:** South Korea's New Southern Policy Lam Peng Er, 2023-04-17 This book examines the first regional strategy of South Korea toward Southeast Asia and India. At issue is how a middle power (a G20 country with the tenth largest economy in the world) seeks to play a larger and more comprehensive role in regions beyond the Korean peninsula. Hitherto, South Korean foreign policy has focused on nuclearizing North Korea, alliance maintenance with the United States, tricky relations with its most important economic partner China, and difficult ties with Japan

marred by historical and territorial disputes. The Moon Administration has sought to diversify South Korean foreign policy by elevating ASEAN and India to the same strategic level as the United States, China, Russia, and Japan. To be sure, the latter countries continue to be most significant to the Korean peninsula. However, this book offers different country and regional perspectives on Seoul's first regional grand strategy to play a role commensurate with its status as a middle power.

**seth speaks pdf: The New Builders** Seth Levine, Elizabeth MacBride, 2021-04-26 Despite popular belief to the contrary, entrepreneurship in the United States is dying. It has been since before the Great Recession of 2008, and the negative trend in American entrepreneurship has been accelerated by the Covid pandemic. New firms are being started at a slower rate, are employing fewer workers, and are being formed disproportionately in just a few major cities in the U.S. At the same time, large chains are opening more locations. Companies such as Amazon with their deliver everything and anything are rapidly displacing Main Street businesses. In *The New Builders*, we tell the stories of the next generation of entrepreneurs -- and argue for the future of American entrepreneurship. That future lies in surprising places -- and will in particular rely on the success of women, black and brown entrepreneurs. Our country hasn't yet even recognized the identities of the New Builders, let alone developed strategies to support them. Our misunderstanding is driven by a core misperception. Consider a typical American entrepreneur. Think about the entrepreneur who appears on TV, the business leader making headlines during the pandemic. Think of the type of businesses she or he is building, the college or business school they attended, the place they grew up. The image you probably conjured is that of a young, white male starting a technology business. He's likely in Silicon Valley. Possibly New York or Boston. He's self-confident, versed in the ins and outs of business funding and has an extensive (Ivy League?) network of peers and mentors eager to help his business thrive, grow and make millions, if not billions. You'd think entrepreneurship is thriving, and helping the United States maintain its economic power. You'd be almost completely wrong. The dominant image of an entrepreneur as a young white man starting a tech business on the coasts isn't correct at all. Today's American entrepreneurs, the people who drive critical parts of our economy, are more likely to be female and non-white. In fact, the number of women-owned businesses has increased 31 times between 1972 and 2018 according to the Kauffman Foundation (in 1972, women-owned businesses accounted for just 4.6% of all firms; in 2018 that figure was 40%). The fastest-growing group of female entrepreneurs are women of color, who are responsible for 64% of new women-owned businesses being created. In a few years, we believe women will make up more than half of the entrepreneurs in America. The age of the average American entrepreneur also belies conventional wisdom: It's 42. The average age of the most successful entrepreneurs -- those in the top .01% in terms of their company's growth in the first five years -- is 45. These are the New Builders. Women, people of color, immigrants and people over 40. We're failing them. And by doing so, we are failing ourselves. In this book, you'll learn: How the definition of business success in America today has grown corporate and around the concepts of growth, size, and consumption. Why and how our collective understanding of entrepreneurship has dangerously narrowed. Once a broad term including people starting businesses of all types, entrepreneurship has come to describe only the brash technology founders on the way to becoming big. Who are the fastest growing groups of entrepreneurs? What are they working on? What drives them? The real engine that drove Silicon Valley's entrepreneurs. The government had a much bigger role than is widely known The extent to which entrepreneurs and small businesses are woven through our history, and the ways we have forgotten women and people of color who owned small businesses in the past. How we're increasingly afraid to fail The role small businesses are playing saving the wilderness, small towns and redlined communities What we can do to turn the decline in entrepreneurship around, especially be supporting the people who are courageously starting small companies today.

**seth speaks pdf: Racing Against History** Rick Richman, 2018-01-30 *Racing Against History* is the stunning story of three powerful personalities who sought in 1940 to turn the tide of history. David Ben-Gurion, Vladimir Jabotinsky, and Chaim Weizmann—the leaders of the left, right, and center of Zionism—undertook separate missions that year to America, then frozen in isolationism, to

seek support for a Jewish army to fight Hitler. Their efforts were at once heroic and tragic. The book presents a portrait of three historic figures and the American Jewish community—at the beginning of the most consequential decade in modern Jewish history—and a cautionary tale about divisions within the Jewish community at a time of American isolationism. Based on previously unpublished materials, the book sheds new light on Zionism in America and the history of World War II, and it aims to stimulate discussion about the evolving relationship between Israel and American Jews, as the Jewish State approaches its 70th anniversary under the continuing threat of annihilation. A book for general readers, history buffs and academics alike, it includes 75 pages of End Notes that enable readers to pursue the stunning story in further depth.
