The uneasy balance between these worlds is shattered when Starr witnesses the fatal shooting of her childhood best friend Khalil at the hands of a police officer. Khalil was unarmed. Soon afterward, his death is a national headline. Some are calling him a thug, maybe even a drug dealer and a gangbanger. Protesters are taking to the streets in Khalil's name. Some cops and the local drug lord try to intimidate Starr and her family. What everyone wants to know is: what really went down that night? And the only person alive who can answer that is Starr. But what Starr does—or does not—say could upend her community. It could also endanger her life. Want more of Garden Heights? Curtis, 2024-01-04 New Directions in Childhood Studies: Innocence, Trauma, and Agency in the Twenty-first Century acknowledges that the conceptual frameworks for understanding the experience of childhood in the twentieth century are no longer adequate and offers important updates to the construct of American childhood. The chapters in this collection examine contemporary children's literature, film, and video games to explore the ways in which everyday realities like trauma, disaster, and death impact the experience of childhood in America today. In many ways, the essays show, the narratives blur traditional lines between children's and adult content, taking children series as subjects while also guiding them through the processes of dealing with the particular challenges. Collectively, the essays develop a more contemporary construct of the American child and offer new insights into what that construction might mean for contemporary American society and culture.

Pamela Newkirk, 2019-10-22 One of Time Magazine's Must-Read Books of 2019 An award-winning journalist shows how workplace diversity initiatives have turned into a profoundly misguided industry--and have done little to bring equality to America's major industries and institutions. Diversity has become the new buzzword, championed by elite institutions from academia to Hollywood to corporate America. In an effort to ensure their

organizations represent the racial and ethnic makeup of the country, industry and foundation leaders have pledged hundreds of millions of dollars to commission studies, launch training sessions, and hire consultants and diversity czars. But is it working? In *Diversity, Inc.*, award-winning journalist Pamela Newkirk shines a bright light on the diversity industry, asking the tough questions about what has been effective--and why progress has been so slow. Newkirk highlights the rare success stories, sharing valuable lessons about how other industries can match those gains. But as she argues, despite decades of handwringing, costly initiatives, and uncomfortable conversations, organizations have, apart from a few exceptions, fallen far short of their goals. *Diversity, Inc.* incisively shows the vast gap between the rhetoric of inclusivity and real achievements. If we are to deliver on the promise of true equality, we need to abandon ineffective, costly measures and commit ourselves to combatting enduring racial attitudes
