the millionaire real estate investor pdf: The Globalisation of Real Estate Dallas Rogers, Sin Koh, 2018-12-07 Individual foreign investment in residential real estate by new middle-class and super-rich investors is re-emerging as a key issue in academic, policy and public debates around the world. At its most abstract, global real estate is increasingly thought of as a liquid asset class that is targeted by foreign individual investors who are seeking to diversify their investment portfolios. But foreign investors are also motivated by intergenerational familial security, transnational migration strategies and short-term educational plans, which are all closely entwined with global real estate investment. Government and local public responses to the latest manifestation of global real estate investment have taken different forms. These range from pro-foreign investment, primarily justified on geopolitical and macro-economic grounds, to anti-foreign investment for reasons such as mitigating public dissent and protecting the local housing market. Within this changing geopolitical context, this book offers a diverse range of case studies from Canada, Hong Kong, Singapore, Russia, Australia and Korea. It will be of interest to academics, policymakers and university students who are interested in the globalisation of local real estate. The chapters in this book were originally published in the International Journal of Housing Policy.

the millionaire real estate investor pdf: *Asian Migration and Education Cultures in the Anglosphere* Megan Watkins, Christina Ho, Rose Butler, 2019-03-27 Asian migration and mobilities are transforming education cultures in the Anglosphere, prompting mounting debates about 'tiger mothers' and 'dragon children', and competition and segregation in Anglosphere schools. This book challenges the cultural essentialism which prevails in much academic and popular discussion of 'Asian success' and in relation to Asian education mobilities. As anxiety and aspiration within these spaces are increasingly ethnicised, the children of Asian migrants are both admired and resented for their educational success. This book explores popular perceptions of Asian migrant families through in-depth empirically informed accounts on the broader economic, social, historical and geo-political contexts within which education cultures are produced. This includes contributions from academics on global markets and national policies around migration and education, classed trajectories and articulations, local formations of 'ethnic capital', and transnational assemblages that produce education and mobility as means for social advancement. At a time when our schooling systems and communities are undergoing rapid transformations as a result of increasing global mobility, this book is a unique and important contribution to an issue of pressing significance. This book was originally published as a special issue of the Journal of Ethnic and Migration Studies.

the millionaire real estate investor pdf: *Dictators Without Borders* Alexander Cooley, John Heathershaw, 2017-01-01 A penetrating look into the unrecognized and unregulated links between

autocratic regimes in Central Asia and centers of power and wealth throughout the West Weak, corrupt, and politically unstable, the former Soviet republics of Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan are dismissed as isolated and irrelevant to the outside world. But are they? This hard-hitting book argues that Central Asia is in reality a globalization leader with extensive involvement in economics, politics and security dynamics beyond its borders. Yet Central Asia's international activities are mostly hidden from view, with disturbing implications for world security. Based on years of research and involvement in the region, Alexander Cooley and John Heathershaw reveal how business networks, elite bank accounts, overseas courts, third-party brokers, and Western lawyers connect Central Asia's supposedly isolated leaders with global power centers. The authors also uncover widespread Western participation in money laundering, bribery, foreign lobbying by autocratic governments, and the exploiting of legal loopholes within Central Asia. Riveting and important, this book exposes the global connections of a troubled region that must no longer be ignored.

the millionaire real estate investor pdf: Pound Foolish Helaine Olen, 2013-12-31 If you've ever bought a personal finance book, watched a TV show about stock picking, listened to a radio show about getting out of debt, or attended a seminar to help you plan for your retirement, you've probably heard some version of these quotes: "What's keeping you from being rich? In most cases, it is simply a lack of belief." —SUZE ORMAN, *The Courage to Be Rich* "Are you latte-ing away your financial future?" —DAVID BACH, *Smart Women Finish Rich* "I know you're capable of picking winning stocks and holding on to them." —JIM CRAMER, *Mad Money* They're common refrains among personal finance gurus. There's just one problem: those and many similar statements are false. For the past few decades, Americans have spent billions of dollars on personal finance products. As salaries have stagnated and companies have cut back on benefits, we've taken matters into our own hands, embracing the can-do attitude that if we're smart enough, we can overcome even daunting financial obstacles. But that's not true. In this meticulously reported and shocking book, journalist and former financial columnist Helaine Olen goes behind the curtain of the personal finance industry to expose the myths, contradictions, and outright lies it has perpetuated. She shows how an industry that started as a response to the Great Depression morphed into a behemoth that thrives by selling us products and services that offer little if any help. Olen calls out some of the biggest names in the business, revealing how even the most respected gurus have engaged in dubious, even deceitful, practices—from accepting payments from banks and corporations in exchange for promoting certain products to blaming the victims of economic catastrophe for their own financial misfortune. *Pound Foolish* also disproves many myths about spending and saving, including: Small pleasures can bankrupt you: Gurus popularized the idea that cutting out lattes and other small expenditures could make us millionaires. But reducing our caffeine consumption will not offset our biggest expenses: housing, education, health care, and retirement. Disciplined investing will make you rich: Gurus also love to show how steady investing can turn modest savings into a huge nest egg at retirement. But these calculations assume a healthy market and a lifetime without any setbacks—two conditions that have no connection to the real world. Women need extra help managing money: Product pushers often target women, whose alleged financial ignorance supposedly leaves them especially at risk. In reality, women and men are both terrible at handling finances. Financial literacy classes will prevent future economic crises: Experts like to claim mandatory sessions on personal finance in school will cure many of our money ills. Not only is there little evidence this is true, the entire movement is largely funded and promoted by the financial services sector. Weaving together original reporting, interviews with experts, and studies from disciplines ranging from behavioral economics to retirement planning, *Pound Foolish* is a compassionate and compelling book that will change the way we think and talk about our money.

the millionaire real estate investor pdf: The Price of Time Edward Chancellor, 2022-08-16 Winner of the 2023 Hayek Book Prize Longlisted for the 2022 Financial Times Business Book of the Year Award A comprehensive and profoundly relevant history of interest from one of the world's leading financial writers, *The Price of Time* explains our current global financial position and how we

got here In the beginning was the loan, and the loan carried interest. For at least five millennia people have been borrowing and lending at interest. The practice wasn't always popular—in the ancient world, usury was generally viewed as exploitative, a potential path to debt bondage and slavery. Yet as capitalism became established from the late Middle Ages onwards, denunciations of interest were tempered because interest was a necessary reward for lenders to part with their capital. And interest performs many other vital functions: it encourages people to save; enables them to place a value on precious assets, such as houses and all manner of financial securities; and allows us to price risk. All economic and financial activities take place across time. Interest is often described as the “price of money,” but it is better called the “price of time:” time is scarce, time has value, interest is the time value of money. Over the first two decades of the twenty-first century, interest rates have sunk lower than ever before. Easy money after the global financial crisis in 2007/2008 has produced several ill effects, including the appearance of multiple asset price bubbles, a reduction in productivity growth, discouraging savings and exacerbating inequality, and forcing yield starved investors to take on excessive risk. The financial world now finds itself caught between a rock and a hard place, and Edward Chancellor is here to tell us why. In this enriching volume, Chancellor explores the history of interest and its essential function in determining how capital is allocated and priced.

the millionaire real estate investor pdf: Families, Housing and Property Wealth in a Neoliberal World Richard Ronald, Rowan Arundel, 2022-11-23 The twenty-first century has so far been characterized by ongoing realignments in the organization of the economy around housing and real estate. Markets have boomed and bust and boomed again with residential property increasingly a focus of wealth accumulation practices. While analyses have largely focussed on global flows of capital and large institutions, families have served as critical actors. Housing properties are family goods that shape how members interact, organise themselves, and deal with the vicissitudes of everyday economic life. Families have, moreover, increasingly mobilized around their homes as assets, aligning household transitions and practices towards the accumulation of property wealth. The capacities of different families to realise this, however, are highly uneven with housing conditions becoming increasingly central to growing inequalities and processes of social stratification. This book addresses changing relationships between families and their homes over the latest period of neo-liberalization. The book confronts how transformations in households, life-course transitions, kinship and intergenerational relations shape, and are being shaped by, the shifting role of property markets in social and economic processes. The chapters explore this in terms of different aspects of home, family life and socioeconomic change across varied national contexts.
