the napping house pdf: *Enhancing RTI* Douglas Fisher, Nancy Frey, 2010-10-01 Are we missing the opportunity to reach struggling learners from the very beginning? Are we hastily—and unnecessarily—referring students to intervention programs that substitute for high-quality core instruction? What if we could eliminate the need for intervention programs in the first place? Response to Intervention (RTI) programs are only as powerful and effective as the core instruction on which they're built. High-quality instruction, then, is the key ingredient that helps all students excel, and it's at the heart of Douglas Fisher and Nancy Frey's unique approach to the RTI model — Response to Instruction and Intervention, or RTI2. In *Enhancing RTI*, the authors argue that students learn best when classroom instruction and supplemental intervention mirror each other in both content and purpose. This book provides K-12 teachers with the knowledge and tools they need to implement a cohesive RTI2 system that helps all children learn by proactively addressing their needs. To this end, you will learn how to * Integrate and align core instruction and supplemental intervention. * Assess your own classroom instruction, in addition to your students' responses to it. * Strengthen existing school improvement efforts within an RTI2 framework. * Utilize systematic feedback to raise student achievement. Fisher and Frey maintain that the RTI2 model not only promotes active student learning, but it also, when done right, promotes a culture of hardwired excellence at all levels of instruction.

the napping house pdf: Governance of Integrated Product Policy Dirk Scheer, Frieder Rubik, 2017-09-08 European policy patterns are in a state of transformation. New governance models are shifting power away from states and toward the involvement of all stakeholders and the idea of shared responsibility. It's a move from command and control to push and pull. What's in this new approach for the environment? This book provides a detailed analysis of the example of integrated product policy (IPP) which aims to improve the environmental performance of products and services through their life-cycle. All products cause environmental degradation in some way, whether from

their manufacturing, use or disposal. The life-cycle of a product is often long and complicated. It covers all the areas from the extraction of natural resources, through their design, manufacture, assembly, marketing, distribution, sale and use to their eventual disposal as waste. At the same time it also involves many different actors such as designers, manufacturers, marketers, retailers and consumers. IPP attempts to systematically stimulate each phase of this complicated chain to improve its environmental performance. With the involvement of so many different products and actors there cannot be one simple policy measure for everything. Instead, IPP employs a whole variety of tools – both voluntary and mandatory – which are used to achieve identified objectives. These include economic instruments, the phase-out of dangerous materials, voluntary agreements, eco-labelling and product design guidelines. IPP is still in relative infancy and can be seen as an ongoing process hugely dependent on effective governance measures to ensure its continued success. This book presents a plethora of perspectives from policy-makers, researchers and consultancies, representatives from business, environmental and consumer associations on how to effectively conceptualise, institutionalise and implement IPP. The book is divided into four parts. First, the approach to the governance of IPP is examined in relation to other approaches to sustainable production and consumption. Second, the widely differing approaches to environmental product policy in practice at national, supranational and global level are analysed. Third, the book explores the challenge of designing a coherent policy mix to support the integration of sustainable consumption and production patterns by sector and theme. Finally, the book concentrates on the key issue of how to involve stakeholders in IPP in order to encourage continuous innovations for sustainability throughout the value chain. Governance of Integrated Product Policy aims to fill a clear gap in work to date on sustainable production and consumption by providing researchers and practitioners from politics, business and civil society new insights into modern environmental governance in practice.

the napping house pdf: The Protection Role of National Human Rights Institutions

Bertie G. Ramcharan, 2005-06-01 One of the more promising developments in global efforts to uphold human rights over the past decade has been the growing role of national human rights institutions. A role for national institutions was foreseen by the United Nations Economic and Social Council as early as 1946 and since the adoption of the Universal Declaration of Human Rights in 1948 the Commission on Human Rights and the United Nations Secretariat have sought to promote the role of such institutions. This volume offers a wealth of information on the protection functions of existing national human rights institutions in a wide selection of countries, drawn from Asia, Africa, Europe, Latin America and Oceania. These essays together make clear the genuine striving by national human rights commissions to act for the protection of human rights in the countries they serve, and the variety of protection models that can and are being adopted, both in developed and developing countries.

the napping house pdf: Protecting the Homeland 2006/2007 Michael d'Arcy, Michael E.

O'Hanlon, Peter R. Orszag, 2007-03-01 Immediately after September 11, the Brookings Institution began a comprehensive, multidisciplinary project focused on the key policy challenge of these dangerous times—assessing and improving homeland defense. That intense effort produced *Protecting the American Homeland*, and it continues in this important new book. In *Protecting the Homeland 2006/2007*, Brookings foreign policy experts analyze current homeland security concerns and the adequacy (or inadequacy) of current policies designed to address them. The authors present both the big picture and the smaller components of homeland security policy that make up the whole. They make specific recommendations on intelligence reform, science and technology policy and the protection of critical infrastructure within the United States. They also look ahead to consider what dangers we should anticipate and plan for, recommending policies that will work to that end. One of the strands running through *Protecting the Homeland 2006/2007* is the need to stitch the seams in our homeland security blanket through greater integration and coordination. The authors emphasize that the U.S. federal government must work together with key partners who have been insufficiently integrated into American homeland security activities to date. These actors include foreign governments, state and local government, and the private sector, and the coordination must occur in several different areas (e.g. border protection, finance, technology, intelligence). The U.S. government should not—indeed, it cannot—do it alone. By its very nature, homeland security is a problem that defies the usual bureaucratic boundaries. Effective homeland security policy demands intense collaboration on new issues and between organizations that have
