Many of the American playwrights who dominated the 20th century are no longer with us: Edward Albee, Arthur Miller, Sam Shepard, Neil Simon, August Wilson and Wendy Wasserstein. A new generation, whose careers began in this century, has emerged, and done so when the theatre itself, along with the society with which it engages, was changing. Capturing the cultural shifts of 21st-century America, *Staging America* explores the lives and works of 8 award-winning playwrights – including Ayad Akhtar, Stephen Adly Guirgis, Young Jean Lee and Quiara Allegría Hudes – whose backgrounds reflect the social, religious, sexual and national diversity of American society. Each chapter is devoted to a single playwright and provides an overview of their career, a description and critical evaluation of their work, as well as a sense of their reception. Drawing on primary sources, including the playwrights' own commentaries and notes, and contemporary reviews, Christopher Bigsby enters into a dialogue with plays which are as various as the individuals who generated them. An essential read for theatre scholars and students, *Staging America* is a sharp and landmark study of the contemporary American playwright.

water by the spoonful pdf: The Theatre of Paula Vogel Lee Brewer Jones, 2023-06-15 In this volume, Lee Brewer Jones examines Paula Vogel as both a playwright and renowned teacher, analyzing texts and early reviews of Vogel's major plays-including *Indecent*, *Desdemona*, *How I Learned to Drive*, and *The Baltimore Waltz*-before turning attention to her influence upon other major American playwrights, including Sarah Ruhl, Lynn Nottage, and Quiara Alegría Hudes. Chapters explore Vogel's plays in chronological order, consider her early influences and offer detailed accounts of her work in performance. Enriched by an interview with Lynn Nottage and essays from scholars Ana Fernández-Caparrós and Amy Muse, this is a vibrant exploration of Paula Vogel as a major American playwright. By the time Paula Vogel made her Broadway debut with her 2017 Rebecca Taichman collaboration *Indecent*, she was already an accomplished playwright, with a Pulitzer Prize for *How I Learned to Drive* (1998) and two Obie Awards. She had also enjoyed a brilliant career as a professor at Brown and Yale with students such as Sarah Ruhl, a MacArthur "Genius" Grant winner, Pulitzer Prize winners Nilo Cruz, Quiara Alegría Hudes, and the only woman to win two Pulitzers for Drama, Lynn Nottage. Vogel's theatre draws upon Russian Formalist Viktor Shklovsky and uses devices such as "defamiliarization" and "negative empathy" to challenge conventional definitions of protagonists and antagonists.

water by the spoonful pdf: Australia's Biodiversity and Climate Change Will Steffen (Lead Author), 2009-12-10 Australia's unique biodiversity is under threat from a rapidly changing climate. The effects of climate change are already discernible at all levels of biodiversity – genes, species, communities and ecosystems. Many of Australia's most valued and iconic natural areas – the Great Barrier Reef, south-western Australia, the Kakadu wetlands and the Australian Alps – are among the most vulnerable. But much more is at stake than saving iconic species or ecosystems. Australia's biodiversity is fundamental to the country's national identity, economy and quality of life. In the face of uncertainty about specific climate scenarios, ecological and management principles provide a sound basis for maximising opportunities for species to adapt, communities to reorganise and ecosystems to transform while maintaining basic functions critical to human society. This innovative approach to biodiversity conservation under a changing climate leads to new challenges for management, policy development and institutional design. This book explores these challenges, building on a detailed analysis of the interactions between a changing climate and Australia's rich but threatened biodiversity. Australia's Biodiversity and Climate Change is an important reference for policy makers, researchers, educators, students, journalists, environmental and conservation NGOs, NRM managers, and private landholders with an interest in biodiversity conservation in a rapidly changing world.
